### STANDARD FEATURES

- Electric controls on both sides with hold-on-to run buttons.
- Frontal dumping.
- Painted stainless steel structure raised from the ground by 4 adjustable feet.
- Lifter/dumper with hydraulic system (dumping height 130 cm).

### ON REQUEST

- Stainless steel structure with micro shot-peening treatment.
- Special construction to discharge at 500 mm height.
- Special connection for bowl not manufactured by MIXER.
- Packaging in wooden crate.

Note: for bowl-trolleys connections not produced by our company, it is necessary to have the bowl to be dumped available at our premises for at least one week. This allows us performing the necessary activities and guaranteeing the correct operation.
